CONTENTS

Volume 11, Issue Nos. 1–4

OPTIMAL CONTROL APPLICATIONS & METHODS

Issue No. 1, January–March 1990

Finite-dimensional Approximation for Optimal Fixed-order Compensation of Distributed Parameter Systems: D. S. Bernstein and I. G. Rosen 1

Maximum Principles Applied to a Model of Consumer Brand Choice: J. A. Soeiro Ferreira 21

Minimum-time Turn Trajectories to Fly-to-Points: J. C. Clements 39

An Optimal Dynamic Output Feedback Controller for a Flexible Spacecraft: A. G. Sreenatha, M. Seetharama Bhat and S. K. Shrivastava 51

SHORT COMMUNICATIONS

Structural and Robust Optimality of Discrete-time Optimal Regulators: K. B. Mirza and A. E. Basha 67

Singular Perturbation Method Applied to the Closed-loop Discrete Optimal Control Problem: M. S. Krishnarayalu 75

A Multidimensional Optimal Stopping-time Problem, with Time-average Criterion: M. Sun 85

Sequential Rank-one/Rank-two Updates for Quasi-Newton Differential Dynamic Programming: A. Rakshit and S. Sen 95

Optimal Response in SISO Ripple-free Deadbeat Systems: O. A. Sebakhy and J. A. Assiri 103

Issue No. 2, April–June 1990

Control of a Long-line-type Plant: M. Szymkat, H. Gorecki and L. Popek. . . . 111

Eigenstructure Assignment with Control Gains Optimization: Q. Zhang and G. L Slater 127

Indexed or abstracted by 'Cambridge Sci. Abstracts', 'Compumath Citation Index', 'Current Contents', 'Engineering Index', 'Eng. Societies Library', 'INSPEC', 'Int. Abstracts in Operations Research', 'Mathematical Reviews', 'SCISEARCH Database'. 'Zentralblatt für Mathematik'.

Optimal Slidesmanship in Conferences with Unpredictable Chairmen: R. F. Hartl and S. Jorgensen 143

Discrete Computer Control of a Triple-inverted Pendulum: H. Meier zu Farwig and H. Unbehauen 157

Shape Optimization Analysis: First- and Second-order Necessary Conditions: H. Cabuk and V. Modi 173

SHORT COMMUNICATION

An Exercise in Modelling of Consumption, Import and Export of an Exhaustible Resource: S. Sethi and G. Sorger 191

Issue No. 3, July–September 1990

Optimal Pole Assignment into Specified Regions and its Applications to Rotating Mechanical Systems: J.-S. Kim and C.-W. Lee 197

Adaptive Root-locus Control for SISO Processes with Time Delays: F.-S. Wang . 211

Relationship Between Åstrom Control and the Kalman Linear Regulator—Caines Revisited: K. Warwick 223

Multivariable Routh-approximant Model Reduction Method in the Time Domain: J. V. Ramakrishnan, S. Vittal Rao and L. R. Koval 233

SHORT COMMUNICATIONS

A Simple Way to Stabilize Discrete Systems with Jump Markov Parameters: E. Yaz 249

Synchronization of n Non-identical Double-integrated Plants: H. Unbehauen and I. Vakilzadeh 257

R & D Spending and Product Pricing: G. M. Erickson 269

A Dynamic Net Present Value Rule in a Financial Adjustment Cost Model: P. M. Kort 277

Stochastically Optimal Advertising Policies Under Dynamic Conditions: The Ratio Rule: K. Raman. 283

Issue No. 4, October–December 1990

On-Line Optimal Terrain-tracking System: S. M. Lee, Z. Bien and S. O. Park . . 289

Mixed H_2 and H_∞ Optimal Robust Control Design: A. G. Sparks, H.-H. Yeh and S. S. Banda 307

A Constrained H^∞ Smooth Optimization Technique: M. E. Fisher, J. B. Moore and K. L. Teo 327

Approximate Parallel Controllers for Discrete Stochastic Weakly Coupled Linear Systems: X. Shen and Z. Gajic 345

SHORT COMMUNICATIONS

A Comparison of some Robust Eigenvalue Assignment Techniques: S. P. Burrows and R. J. Patton 355

The Optimal Control Problem for the Vidale–Wolfe Advertising Model Revisited: G. Ferreyra 363
